PROFESSIONAL SUMMARY

Full stack developer with 1+ year of industry experience building web applications with React, Node.js, Express.js and PostgreSQL. Skilled in REST API development, authentication, dynamic form-driven interfaces and production debugging. Built LedgerX, a live double-entry financial ledger with database-enforced invariants and idempotent transactions.

EDUCATION

Deenbandhu Chhotu Ram University of Science & Technology (DCRUST) **Sep 2022 – May 2026**
B.Tech: Electronics & Communication Engineering (CGPA: 8.26 / 10) | Murthal, Haryana

Modern Vidya Niketan (CBSE) **2022**
Class XII: 93.2% | Faridabad, Haryana

EXPERIENCE

Analyst Trainee: Acuity Analytics | Gurugram, Haryana **May 2026 – Present**

- Built dynamic survey interfaces in React and JavaScript with conditional branching, skip logic and real-time input validation for live client research projects.
- Integrated survey frontends with backend REST APIs to load questionnaire configurations, submit responses and enforce quotas, troubleshooting API failures and data mismatches.
- Debugged production issues in live surveys end-to-end, tracing logs, API responses and response data to find and fix root causes of broken logic, validation errors and data inconsistencies.

Full Stack Developer Intern: Qlimber Consulting Pvt. Ltd. | Faridabad, Haryana **Jul 2025 – Apr 2026**

- **Logistics Platform:** Built and tested 10+ REST API endpoints with React, Node.js, Express.js and PostgreSQL; wrote Express middleware for JWT / OAuth2 authentication, role-based access control and request validation.
- **OData API Platform:** Developed OData services that unify multiple database engines behind a single query API, letting users connect any supported database without custom integration code.
- **Client Performance Project:** Improved a client application's page load speed by optimizing SQL queries, trimming API payloads and reducing front-end re-renders.
- Integrated CRM systems and automated cross-system business workflows using **Workato**.

PROJECTS

LedgerX – Double-Entry Financial Ledger | Live Demo **React, Node.js, Express.js, PostgreSQL**

- Built a double-entry ledger with 16 REST API endpoints across 6 resource groups, covering 7 transaction flows: top-ups, payments with fee splits, holds, captures, full and partial refunds, and reversals. All amounts are stored as integer minor units to avoid floating-point errors.
- Enforced 3 financial invariants in PostgreSQL triggers (zero-sum transactions, immutable postings, currency matching), plus idempotency keys for exactly-once writes and ordered row locking to prevent deadlocks.
- Shipped a React + Vite dashboard with a live journal, an interactive API explorer for testing every endpoint, analytics charts, a 7-point reconciliation audit and workspace-based multi-tenancy.

RGC System – Health Membership Platform **Next.js 14, TypeScript, PostgreSQL**

- Built a full-stack health membership platform (freelance) with 4 role-based portals (Admin, Consultant, Hospital, Member) on a PostgreSQL database with 37 version-controlled migrations.
- Designed a forgery-proof digital card system using signed QR codes, with automatic PDF card generation and email delivery on enrollment.
- Implemented role-based auth across 9 API groups, online and offline payments via Razorpay, automated plan expiry, and admin revenue dashboards.

SKILLS

- JavaScript (ES6+) & TypeScript
- Python & SQL
- React.js & Next.js
- Redux & Tailwind CSS
- HTML5 & CSS3
- Node.js & Express.js
- RESTful APIs & Redis
- JWT, OAuth2 & WebSockets
- PostgreSQL, MySQL & MongoDB
- RAG & Generative AI
- Docker & CI/CD Pipelines
- Git, GitHub & Postman
- Agile & Monolithic Architecture
- Pandas & NumPy
- OOP & DBMS

CERTIFICATIONS

- Oracle Cloud Infrastructure (OCI): Generative AI Professional & AI Foundations Associate

ACHIEVEMENTS

- **General Secretary, E-Cell DCRUST:** Led a 25-member team, organized entrepreneurship events for 100+ students, and coordinated startup sponsorships.
- **Member, DCRUSTODC:** Part of DCRUST's first developer community, participating in competitive programming contests, DSA discussions, collaborative projects, and open-source contributions.
